

ANUPRIYA KUMARI RANJAN

anu89ranjan89@gmail.com — +91-8176089337 — Lucknow, Uttar Pradesh — LinkedIn — GitHub

Professional Summary

AI-focused MCA student at the **Institute of Engineering and Technology (IET), Lucknow** with hands-on experience developing intelligent applications using **Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Semantic Search, Embeddings, and Machine Learning**. Proficient in building full-stack applications using **Python, React.js, Next.js, FastAPI, PostgreSQL, Firebase, and Docker**. Passionate about building scalable AI-powered software solutions that solve real-world problems through intelligent automation and software engineering.

Technical Skills

Languages: Python, Java

Frontend: React.js, Next.js, HTML5, CSS3

Backend: FastAPI, REST APIs

AI / ML: Agentic AI, LLMs, RAG, Prompt Engineering, NLP, Semantic Search, Embeddings, LangChain, LangGraph, Hugging Face Transformers, XGBoost, Random Forest

Databases: PostgreSQL, Firebase, FAISS

Tools: Git, GitHub, Docker, Streamlit, Postman, Tableau, Microsoft Excel

Projects

SheSync AI – AI-Powered Women’s Health Assistant *Next.js — FastAPI — PostgreSQL — XGBoost — Random Forest — Docker*

- Developed a full-stack AI-powered healthcare platform focused on menstrual health, PMOS awareness, symptom tracking, and personalized healthcare guidance.
- Integrated **Machine Learning** models including **XGBoost** and **Random Forest** to analyze health data and generate personalized recommendations.
- Leveraged **Retrieval-Augmented Generation (RAG)** and **Large Language Models (LLMs)** to provide context-aware healthcare assistance.
- Designed scalable backend APIs using **FastAPI** with **PostgreSQL** for efficient data management and AI inference.
- Built responsive user interfaces using **Next.js** and containerized the application using **Docker**.

MoneyMind AI – Intelligent Personal Finance Assistant *React.js — FastAPI — LLMs*

- Developed an AI-powered personal finance assistant for expense tracking, budgeting, and financial planning.
- Integrated **Large Language Models (LLMs)** to generate personalized financial insights and recommendations.
- Built conversational AI workflows to simplify financial analysis and improve user decision-making.

AI Medical Assistant *Python — LangChain — FAISS — FastAPI*

- Developed a healthcare chatbot using **Retrieval-Augmented Generation (RAG)** for medical question answering.
- Processed medical documents using chunking, embeddings, semantic retrieval, and the **FAISS** vector database.
- Integrated **LangChain** with **FastAPI** to generate contextual and retrieval-grounded responses.

Positions of Responsibility

Training and Placement Coordinator *IET, Lucknow*
Jan 2026 – Present

- Coordinate placement activities between recruiters, faculty members, and students to ensure smooth recruitment processes.
- Serve as a liaison between the Training and Placement Cell, recruiters, and student batches.
- Assist in organizing placement drives, interview schedules, and professional development sessions.
- Support students with placement-related communication and overall placement readiness initiatives.

Hackathons & Achievements

Agentic AI-Based Multimodal Insurance Claim Validator *HackerRank Orchestrate Hackathon*

AI Job Matchmaker & Talent Intelligence Platform *RedRob Hackathon*

Goldman Sachs India Hackathon 2026 (CS Edition)

Google Summer of Code (GSoC) 2026

2 Star on Codechef

Solved upto 200+ DSA problems on various platforms like Codechef, Leetcode, GeeksforGeeks etc.

Education

Institute of Engineering and Technology (IET), Lucknow 2025 – Present
Master of Computer Applications (MCA)
CGPA: **8.57**
